

### Wed, May 4

#### Session A: Polymers in Confinement

09:00 - 09:30	J.-F. Gérard (Clermont-Ferrand, France)	Hybrid Organic-Inorganic Nanomaterials and Nanocomposites: Self-Assembling, Crystalization, and Polymer Confinement Features
09:30 - 10:00	U. Steiner (Cambridge, UK)	Polymer Films far from Thermodynamic Equilibrium
10:00 - 10:30	Coffee Break	
10:30 - 11:00	G. McKenna (Lubbock, USA)	Dynamics in Confinement: Considerations of Small Molecules and of Polymer Films
11:00 - 11:30	J. Forrest (Waterloo, Canada)	Exploring Surface Dynamics of Polymeric and Non-Polymeric Glasses
11:30 - 13:00	Discussion	
13:00 - 14:30	Lunch Break	

#### Session B: Polymers and Self-Assembly

14:30 - 15:00	H. Möhwald (Potsdam, Germany)	Polymeric Films with Stimuli Sensitive Mechanics and Remote Release
15:00 - 15:30	A. N. Semenov (Strasbourg, France)	Self-organising Structures of Chiral Amphiphiles
15:30 - 16:00	Coffee Break	
16:00 - 16:30	E. Frey (Munich, Germany)	Dynamics of Semiflexible Polymers
16:30 - 17:00	I. Kulić (Strasbourg, France)	Conformational Switching Dynamics of Cytoskeletal Filaments
17:00 - 18:30	Discussion	
as of 19:00	Dinner	
as of 20:30	Postersession + Dessert	

### Thu, May 5

#### Session C: Polymer Dynamics

09:00 - 09:30	A. P. Sokolov (Knoxville, USA)	Polymer Dynamics on Different Scales: From a Segment to the Entire Chain
09:30 - 10:00	E. Rössler (Bayreuth, Germany)	Identifying the full Microscopic Dynamics of Entangled Polymers by means of $^1\text{H}$ NMR
10:00 - 10:30	Coffee Break	
10:30 - 11:00	D. Richter (Jülich, Germany)	On the Dynamics of Polymers in Nanocomposites
11:00 - 11:30	A. Likhtman (Reading, UK)	Review of stochastic models for unentangled and entangled polymer melts
11:30 - 13:00	Discussion	
13:00 - 14:30	Lunch Break	

#### Session D: Polymers and Optoelectronics

14:30 - 15:00	K. Kremer (Mainz, Germany)	Organic Materials for Molecular Electronics: Scale Bridging Simulation Approach
15:00 - 15:30	D. Neher (Potsdam, Germany)	Chain Aggregation and Function in Conjugated Polymer Layer
15:30 - 16:00	Coffee Break	

### Thu, May 5

#### Session D (continued): Polymers and Optoelectronics

16:00 - 16:30	J. Loos (Glasgow, UK)	Volume Organisation of Polymer-Based Solar Cells
16:30 - 17:00	L. Wang (Mons, Belgium)	Modeling of Conjugated Polymers for Organic Electronics
17:00 - 18:30	Discussion	
as of 19:00	Dinner	
as of 20:30	Postersession + Dessert	

### Fri, May 6

#### Session E: Polymer Crystallization

09:00 - 09:30	J.-U. Sommer (Dresden, Germany)	Polymer Crystallization: Ordered Structures in Complex Systems
09:30 - 10:00	K. Dalnoki-Veress (Hamilton, Canada)	Homogeneous Bulk, Surface, and Edge Nucleation in Crystalline Nanodroplets
10:00 - 10:30	Coffee Break	
10:30 - 11:00	C. Schick (Rostock, Germany)	Nucleation and Crystallization in poly( $\epsilon$ caprolactone) (PCL)
11:00 - 11:30	W. Paul (Halle-Wittenberg, Germany)	Gas, Liquid and Crystal Phases of a Single Macromolecule
11:30 - 13:00	Discussion	
13:00 - 14:30	Lunch Break	
as of 14:30	Departure
